THE ARTIFICER

CLASS FEATURES

As an artificer, you gain the following class features

HIT POINTS

Hit Dice: 1d8 per artificer level

Hit Points at 1st Level: 8 + your Constitution modifier

Hit Points at Higher Levels: 1d8 (or 5) + your Constitution modifier per artificer level after 1st

PROFICIENCIES

Armor: Light armor, Medium armor, Shields

Weapons: Simple weapons

Tools: Thieves' tools, tinker's tools, one type of artisan's tools of your choice

Saving Throws: Constitution, Intelligence

Skills: Choose two from Arcana, History, Investigation, Medicine, Nature, Perception, Sleight of Hand

EQUIPMENT

You start with the following equipment, in addition to the equipment granted by your background:

- any two simple weapons
- a light crossbow and 20 bolts
- (a) studded leather armor or (b) scale mail
- thieves' tools and a dungeoneer's pack

SPELLCASTING

1st Level Artificer feature

You have learned how to create magical devices called gadgets that interact with and harness the fundamental magic of the world.

TOOLS REQUIRED

In order to create your gadgets, you must have tools - theive's tools or some other artisan's tools - in hand when you create your gadget. You must be proficient with the tool to use it in this way. See the equipment chapter in the Player's Handbook for descriptions of these tools.

CANTRIPS (0-LEVEL SPELLS)

At 1st level, you know two cantrips of your choice from the artificer spell list. At higher levels, you learn additional artificer cantrips of your choice, as shown in the Cantrips Known column of the Artificer table. When you learn a cantrip, you can create devices that can be activated to cast the cantrip. Only you can use the device to cast its cantrip, and the device must be accessible to you in order to cast the cantrip.

When you gain a level in this class, you can replace one of the artificer cantrips you know with another cantrip from the artificer spell list.

GADGETS

You have a number of spell slots as shown on the artificer table. You regain spell slots at the end of a long

rest.

You know a number of artificer spells equal to your artificer level + your Intelligence modifier.

With 10 minutes of work, you can spend an artificer spell slot to create a gadget that lets you cast a spell. When you do so, choose a spell from the Artificer spell list of 1st level or higher. You expend a spell slot of that level or higher to imbue a gadget with the given spell. While the gadget is imbued in this way, you can touch it and activate it using a free action on your turn. Upon activation, you can cast the imbued spell once through your gadget, at which point the gadget becomes inert and non-magical.

A gadget remains imbued until it is used, destroyed, or until you take a long rest. Other creatures lack your specific knowledge about how your gadgets work, preventing them from using your gadgets to cast spells.

For example, if you are a 5th-level Artificer, you have four 1st-level and two 2nd-level spell slots. You can spend one 1st-level spell slot to create a *Cure Wounds* gadget. Until the next long rest, you can touch this gadget to cast *Cure Wounds* once at 1st-level, expending the gadget when you do so.

Gadgets are considered Tiny objects. While not being worn or carried, they have an AC of 15 and 1 hit points. They also have a damage threshold equal to your proficiency bonus + your Intelligence modifier. If a gadget's hit points are reduced to zero, the gadget is destroyed and the imbued spell disappears harmlessly.

SPELLCASTING ABILITY

Spell save DC = 8 + your proficiency bonus + your Intelligence modifier

Spell attack modifier = your proficiency bonus + your Intelligence modifier

RITUAL CASTING

You can cast an Artificer spell as a ritual if that spell has the ritual tag. When you cast it this way, you can do so without requiring a gadget and without expending a spell slot.

INGENUITY

2nd Level Artificer feature

And 2nd level, you have begun experimenting with modifications to your spellcasting gadgets.

Modifications: Whenever you create a gadget, you can apply a Modification to enhance it in some way. When you activate this gadget, it gains the benefit of the Modification. When you modify a Cantrip gadget, you create a new gadget with the modifications, which can only be used once.

Ingenuity Points: You can turn spell slots into Ingenuity Points equal to the spells level. Whenever you apply a modification, you must expend one Ingenuity Point. You lose all Ingenuity Points at the start of a long rest.

Modifications have a tag, listed in parentheses after the modification's name. A gadget may only benefit from one Modification with a given tag. For example, one *Cure Wounds* gadget can't benefit from both *Concealed* and *Armor Plated*, as they both have the **(Casting)** tag.

Additionally, some Modifications have automatic-targeting on a given creature or object. For these gadgets, spells targeting one or more creatures will only target a single specified creature. Spells originating at a point in space originate from the location of the gadget. If no target is applicable, the spell fails and the gadget is expended as normal.

ARTIFICER SPECIALIZATION

3rd Level Artificer feature

At 3rd level, you choose specialization from the following: Alchemist, Armorer, Artillerist, and Battle Smith, each of which is detailed at the end of the class description. Your choice grants you features at 3rd level and again at 5th, 9th, and 15th level.

THE RIGHT TOOL FOR THE JOB

3rd Level Artificer feature

Also at 3rd level, you've learned how to produce exactly the tool you need: with thieves' tools or artisan's tools in hand, you can magically create one set of artisan's tools in an unoccupied space within 5 feet of you. This creation requires 1 hour of uninterrupted work, which can coincide with a short or long rest. Though the product of magic, the tools are non magical, and they vanish when you use this feature again.

ABILITY SCORE IMPROVEMENT

4th Level Artificer feature

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

MAGICAL EXPERIMENTATION

5th Level Artificer feature

At 5th level, you've developed a method for creating technology from arcane formulas and instructions. At the end of a long rest, you may create one gadget using a spell scroll in your possession. Creating a gadget in this way uses the rules for casting a spell scroll, except that you may treat a spell from any class's list as an Artificer spell for you. When the casting is complete, you create a gadget, and can add modifications to it as normal.

TOOL EXPERTISE

6th Level Artificer feature

At 6th level, your proficiency bonus is now doubled for any ability check you make that uses your proficiency with a tool.

FLASH OF GENIUS

7th Level Artificer feature

At 7th level, you've gained the ability to come up with solutions under pressure. When you or another creature you can see within 30 feet of you makes an ability check or a saving throw, you can use your reaction to add your Intelligence modifier to the roll.

You can use this feature a number of times equal to your Intelligence modifier (minimum of once). You regain all expended uses when you finish a long rest.

ITEMIZATION

11th Level Artificer feature

At 11th level, you can create more robust gadgets that can be used repeatedly over long periods of time. When you create a cantrip gadget, you can choose to attune to it as though it were a magic item. While attuned, the gadget benefits from any Modifications it has for all casts of the cantrip.

SOUL OF ARTIFICE

20th Level Artificer feature

At 20th level, you have perfected the use of your modifications and gadgets:

When you use a modified gadget or specialization device, you gain a +1 to your spellcasting modifier for each modification currently applied to that gadget or device.

When you create a gadget during a long rest, you can choose to make it into a artificer's Machine. These Machines are Medium objects, don't count against your number of gadgets, and it can cast its imbued spell multiple times and doesn't lose the imbued spell when you take a long rest. If the Machine moves more than 10ft from where you created it, it breaks and loses its imbued spell.

Creating a Machine costs 100gp per level of the imbued spell.

MODIFICATIONS

CONCEALED (CASING)

Gadgets with this mod are made to appear as ordinary objects which do not raise suspicion. To determine that the object has magical properties, a creature must succeed on an Investigation check against your spell save DC. When you use these gadgets, there is no indication to nearby creatures that the effect originated from you.

ARMOR PLATED (CASING)

Any gadgets with this mod are designed to be more resilient and harder to destroy. When not being worn or carried, gadgets with this mod have an AC of 19. The gadget also has a damage threshold equal to your artificer level + your Intelligence Modifier.

MUNITIONS (CASING)

You may attach any gadget with this mod to an arrow, bolt, or dart. When this ammo is used to make a ranged attack, the gadget is cast immediately when that attack hits, and vanishes harmlessly if the attack misses. The gadget has automatic-targeting on the target of the ranged attack.

ATTACHMENT (CASING)

You can spend an action attaching this gadget to a weapon capable of making melee weapon attacks. When you hit a melee weapon attack with this weapon, you can choose to activate the gadget. The gadget has automatic-targeting to the target of the weapon attack.

COUNTDOWN (TRIGGER)

When activating this gadget, you define a delay to take place after you touch it and before the gadget activates and casts its spell. This delay must be at least 12 seconds.

AUTOMATED (TRIGGER)

When you apply this gadget, declare a trigger as though you were readying an action to cast the imbued spell. When this trigger occurs, the gadget activates and has automatic targeting on the nearest creature.

Gadgets with this modification can no longer be activated by simply touching them. There is also no way to prevent activation once the trigger occurs.

EMERGENCY (TRIGGER)

Gadgets with this trigger will automatically trigger in emergency situations. When the holder of the gadget drops to 0 hit points, the gadget will activate and has automatic-targeting on the nearest hostile or allied creature (your choice when you create the gadget).

Gadgets with this modification can no longer be activated by simply touching them.

USER-FRIENDLY (TRIGGER)

Any gadgets with this mod are designed to be more simplistic and easy to use on the surface. Other creatures with an intelligence of 9 or higher can use your gadget to cast its imbued spell. The creature uses their Intelligence as their spellcasting ability (they are considered proficient in this spellcasting) and holds concentration on the spell if necessary.

SMART TARGETING (SPECIAL)

You equip your gadgets with a smart targeting system which helps guarantee that they connect. If the gadget requires that you make an attack roll, the attack is made with advantage and ignores the effects of half or three-quarters cover.

DATA STORAGE (SPECIAL)

You can store parameters for your gadget internally. As an action, you can touch the gadget and choose optional parameters for the spell as though you were casting it (such as choosing the message in *Message* or issuing one order to a summoned creature). If the gadget is activated, it uses these parameters and does not require or allow the caster to declare them.

AI SYSTEM (SPECIAL)

Prerequisite: 10th level artificer

You gain the ability to mod gadgets with an advanced AI. When you use a gadget with this mod to cast a concentration spell, the gadget will hold concentration instead of you. If the gadget is on your person, damage to you can break its concentration. If it is not, damage to the gadget can do the same. The AI has a Con score of 10 for the purposes of holding concentration.

SYSTEM LINK (SPECIAL)

Prerequisite: 10th level artificer

This modification cost two Ingenuity Points to apply to a gadget.

You are able to combine gadgets together in order to stack their effects. When you apply this mod to a gadget, choose one other gadget you currently have. Whenever the gadget with this mod activates, the one you chose activates immediately afterward. These two gadgets count as the same object, however they still both count against your total number of gadgets.

ARTIFICER SPECIALIZATIONS

ALCHEMIST

You specialize in magical effects created by the mixture of arcane chemicals. Your gadgets might be characterized by glass tubes, pumps, and mixing chambers that might release noxious gasses into a room or distribute healing fluids through syringe injection.

SPECIALIZED DEVICE: MIXING DEVICE

3rd Level Alchemist feature

At 3rd level, You create a robust device for concocting and deploying your alchemical creations: your Mixing Device. At the end of each long rest, you may expend a number of spell slots to store them in your mixing device.

While the mixing device is on your person, you may activate your mixing device and expend a stored spell slot to cast a spell from the Alchemist spell list. The stored spell slots disappear when you take a long rest.

Should your Mixing Device be lost or destroyed, you can reconstruct it using 1 hour of uninterrupted work. This construction can be performed during a short or long rest, and it destroys the previous Mixing Device.

ALCHEMIST SPELL LIST

Artificer

Level

Alchemist Spells

3rd

Melf's Acid Arrow, Ray of Enfeeblement, Armor of Agathys, Ray of Sickness, Dragon's Breath

5th

Fear, Gaseous Form

9th

Blight, Death Ward

13th

Cloudburst, Raise Dead

ALCHEMICAL MODIFICATIONS

3rd Level Alchemist feature

Also at 3rd level, you know additional modifications that you can apply to your gadgets. This list is detailed at the end of this specialization description.

At the end of a long rest, you may apply modifications to your Mixing Device. These modifications must be from the extended list granted by this feature. The modifications last until the start of your next long rest, and they apply to all spells cast through your Mixing Device.

ALCHEMICAL SAVANT

5th Level Alchemist feature

At 5th level, when you use your Magical Experimentation feature, you may add your *Experimental Elixir* modification to the resulting gadget without expending an Ingenuity Point.

RESTORATIVE REAGENTS

9th Level Alchemist feature

Starting at 9th level, you can incorporate restorative reagents into some of your works:

You learn the Cure Wounds and Lesser Restoration spells, and they count as Alchemist Spells for you. You can cast each through your Mixing Device without expending a spell slot, and without providing the material component. You can cast each a number of times equal to your Intelligence Modifier (minimum once) and regain all expended uses when you finish a long rest

CHEMICAL MASTERY

15th Level Alchemist feature

By 15th level, you have been exposed to so many chemicals that they pose little risk to you, and you can use them to quickly end certain ailments:

You gain resistance to acid damage and poison damage, and you are now immune to the poisoned condition. You learn the Greater Restoration and Heal spells, and they count as Alchemist spells for you. You can cast each once through your Mixing Device without expending a spell slot, and without providing the material component. You regain your ability to do this when you finish a long rest.

ALCHEMIST MODIFICATIONS

EXPERIMENTAL ELIXIR (CASING)

Your gadget takes the form of a chemical mixture in a small vial. A creature can spend a bonus action to drink

the liquid, activating the gadget when they do so. The gadget has automatic-targeting on the ingestor (consider the investor's mouth to be the gadget location).

The ingestor is automatically hit with any attack rolls associated with the spell, and automatically fails Strength or Dexterity saving throws associated with the spell. If they are unaware that they are drinking a magical elixir, they also have disadvantage on all saving throws associated with the spell.

When presented with the elixir, or elixir mixed into another liquid, a creature can make an Investigation check against your spell save DC to detect its magical nature.

Gadgets with this modification can no longer be activated by simply touching them.

BLOOD DEEP (SPECIAL)

Via poisons, chemicals, and noxious gasses, your spells are better at inflicting harmful conditions on your victims. If a magical effect from this gadget on a creature would end early (such as by a saving throw, breaking of concentration, or the *Dispel Magic* spell), the creature must roll 1d6. On a 1 or a 2, the effect does not end early, and instead the creature must repeat this roll at the end of each of its turns to end the effect.

INTRAVENOUS (TRIGGER)

The gadget is attached intravenously to your body, allowing for chemical agents to rapidly enter the bloodstream. This gadget can be activated as a reaction when you take damage. In order to gain this benefit, the imbued spell must have a range of touch or self and must have a casting time of one action or one bonus action.

If this gadget is ever removed from your person, you take 1d4 piercing damage.

ARMORER

You specialize in the construction and maintenance of a high tech suit of armor. An extension of yourself, the armor provides powerful defensive and offensive tools, and allows for customization and modification as your partnership with it evolves.

SPECIALIZED DEVICE: ARCANE ARMOR

3rd Level Armorer feature

At 3rd level, You create a robust device to protect and extend your own abilities: your Arcane Armor. This armor is a modified version of one set of medium or heavy armor in your possession, which you become proficient with. The armor gains the following features:

- If the armor normally has a Strength requirement, the arcane armor lacks this requirement for you.

- The armor attaches to you and can't be removed against your will. It also expands to cover your entire body, although you can retract or deploy the helmet as a bonus action. The armor replaces any missing limbs, functioning identically to a body part it is replacing.
- You can doff or don the armor as an action.

At the end of each long rest, you may expend a number of spell slots to store them in your arcane armor. While the arcane armor is on your person, you may activate your arcane armor and expend a stored spell slot to cast a spell from the Armorer spell list. The stored spell slots disappear when you take a long rest.

You can reconstruct your Arcane Armor with a different set of medium or heavy armor using 1 hour of uninterrupted work. This construction can be performed during a short or long rest, and it destroys the previous Arcane Armor. Otherwise, your Arcane Armor lasts until you die.

ARMORER SPELL LIST

Artificer Level	Armorer Spells
3rd	<i>Mirror Image, Flame Blade, Invisibility, Shield, Magic Missile</i>
5th	<i>Nondetection, Lightning Bolt</i>
7th	<i>Fire Shield, Greater Invisibility</i>
9th	<i>Far Step, Wall of Force</i>

ARMOR MODIFICATIONS

3rd Level Armorer feature

Also at 3rd level, you know additional modifications that you can apply to your gadgets. This list is detailed at the end of this specialization description.

At the end of a long rest, you may apply modifications to your Arcane Armor. These modifications must be from the extended list granted by this feature. The modifications last until the start of your next long rest, and they apply to all spells cast through your Arcane Armor.

EXTRA ATTACK

5th Level Armorer feature

Also at 5th level, you can attack twice, rather than once, whenever you take the Attack action on your turn.

ENHANCING ARMOR

9th Level Armorer feature

Starting at 9th level, your armor enhances your normal capabilities.

You learn the *Fly* and *Enhance Ability* spells, which count as an Armorer Spells for you. You can cast each spell through your Arcane Armor once without using a spell slot. You regain the ability to do so after a long rest.

ARCANE SHIELD

15th Level Armorer feature

Starting at 15th level, your armor gains a special regenerating force field called the Arcane Shield. You can activate this shield as a bonus action, and it lasts for 1 minute or until you die or doff your Arcane Armor. When you activate your Arcane Shield, it has ten hit points.

While wearing your armor, whenever an attack misses you, you can increase your Arcane Shield hit points by one, up to a maximum of your artificer level. Whenever you take damage, the shield takes the damage instead. If this damage reduces the shield to 0 hit points, you take any remaining damage.

You can activate your Arcane Shield a number of times equal to your Intelligence Modifier, and regain all expended uses at the end of a long rest.

ARMORER MODIFICATIONS

BUILT-IN (CASING)

Your gadget is built into your Arcane Armor. While you are wearing your armor the gadget cannot be lost or removed from your person, and you can activate it without needing to touch it with a free hand.

OVERCHARGE (SPECIAL)

By redirecting large stores of power from your armor to your gadget, you can overcharge it to massively increase damage. When you activate this gadget, your movement drops to zero, you have disadvantage on Dex saving throws, and you can't take reactions until the start of your next turn as you begin charging up your gadget. At the start of your next turn, the imbue spell is cast (no action required). Any damage dealt by this spell on that turn is treated as a critical hit.

COMBAT READY (TRIGGER)

This gadget integrates with your armor's AI, ready to activate the instant a situation goes south. As a reaction when you roll initiative, you may activate one gadget with the Combat Ready modification. The imbued spell must have a range of touch or self, target only you, and must have a casting time of one action or one bonus action.

ARTILLERIST

You specialize in the creation of ranged weaponry, built with astounding efficiency, accuracy, and power. Your gadgets take the form of various blasters or rays, requiring both supreme intellect and solid accuracy.

SPECIALIZED DEVICE: ELDRITCH FIREARM

3rd Level Artillerist feature

At 3rd level, You create a robust device to annihilate enemies from afar: the Eldritch Firearm. At the end of each long rest, you may expend a number of spell slots to store them in your Eldritch Firearm.

While the Eldritch Firearm is on your person, you may activate your Eldritch Firearm and expend a stored spell slot to cast a spell from the Artillerist spell list. The stored spell slots disappear when you take a long rest.

If your Eldritch Firearm is ever lost or destroyed, you can create a new one with 1hr of uninterrupted work. Alternatively, you can magically resummon your existing Eldritch Cannon as a bonus action and spend one of its stored spell slots.

ARTILLERIST SPELL LIST

Artificer Level	Artillerist Spells
3rd	<i>Scorching Ray, Web, Guiding Bolt, Hex</i>
5th	<i>Lighting Arrow, Counterspell</i>
7th	<i>Dimension Door, Freedom of Movement</i>
9th	<i>Cone of Cold, Conjure Volley</i>

ARTILLERIST MODIFICATIONS

3rd Level Artillerist feature

Also at 3rd level, you know additional modifications that you can apply to your gadgets. This list is detailed at the end of this specialization description.

At the end of a long rest, you may apply modifications to your Eldritch Firearm. These modifications must be from the extended list granted by this feature. The modifications last until the start of your next long rest, and they apply to all spells cast through your Eldritch Firearm.

ARCANE FIREARM

5th Level Artillerist feature

At 5th level, your Eldritch Firearm takes on an enhanced form of your choice from the list below, and becomes a ranged weapon with which you are proficient. This weapon uses arcane bullets that you can freely create as its ammunition (which can be used in a Mutations Modification). The weapon has properties based on its form, as well as additional abilities described below. Only you can use your Arcane Firearm as a weapon.

The Drifter: Your Firearm has the Light, and Range (60/120) properties and deals 1d8 piercing damage. You have two Eldritch Firearms, which count as the same device for the purposes of your Specialized Device feature (for example, they share one pool of stored spell slots), but as two separate weapons. When you make an attack with one of these weapons, you can draw and stow the weapon as part of the attack.

The Warden: Your Firearm has the Two-Handed, and Range (15/25) properties and deals 2d6 piercing damage. When you make an attack against a creature, you may also choose one additional target within 5ft of the creature to be a target of the attack. Furthermore, any hit with this weapon against an object counts as a critical hit.

The Sharpshooter: Your Firearm has the Two-Handed, and Range (500/1500) properties and deals 1d12 piercing damage. On your turn, you can forgo all

of your movement to give yourself advantage on the next attack you make with this weapon on this turn.

GUNSLINGER'S FOCUS

9th Level Artillerist feature

Starting at 9th level, you are able to dramatically improve your aim in moments of intense focus. On your turn, you can spend a bonus action to enter a focused state. This state lasts for 1 minute, and requires concentration. While in this state, you get the following benefits:

- You can spend a bonus action to mark a creature you can see within your ranged weapon's range. If that creature voluntarily moves more than 5ft, you can spend your reaction to make a ranged opportunity attack against it. You can only make this opportunity attack if you still have Gunslinger's Focus active.
- Your ranged spell attack and ranged weapon attack rolls are critical hits on a roll of 19 or 20 on the d20.

IMPROVED GUNSLINGER'S FOCUS

15th Level Artillerist feature

Starting at 15th level, you gain the following benefits while your Gunslinger's Focus is active:

- You can't have disadvantage on ranged attack rolls.
- Once per turn, if you miss an attack roll, you can choose to hit instead. In order to use this feature again on the same turn, you must spend one spell slot stored in your Eldritch Firearm.

ARTILLERIST MODIFICATIONS

SELF-DESTRUCT (CASING)

The leftover potential energy of the gadget is retrofitted to allow for an emergency secondary use. After this gadget has been destroyed or activated, but before your next long rest, you can command it to detonate so long as it is within 60ft of you. Doing so destroys the gadget and forces each creature within 20 feet of it to make a Dexterity saving throw against your spell save DC, taking 3d8 force damage on a failed save or half as much damage on a successful one.

QUICK DRAW (TRIGGER)

This gadget is holstered, easily accessible, and ready to fire, similar to a weapon. As a reaction when you roll initiative, you may activate this gadget. The imbued spell must make an attack roll to gain this benefit.

DODGE ROLL (SPECIAL)

Deploying this gadget threads easily into enhanced combat movements. When you activate this gadget, you may immediately move up to 10ft without provoking opportunity attacks. You can cast the imbued spell at any point during this movement.

ROBOTICIST

You specialize in the creation of lifelike constructs and automatons which assist you and allies on the battlefield.

SPECIALIZED DEVICE: STEEL COMPANION

3rd Level Roboticist feature

At 3rd level, You create a robust device to defend and assist you and your teammates: your Steel Companion.

Choose a beast that is no larger than Medium and that has a challenge rating of 1/4 or lower. Your Steel Companion uses this beast's stat block, with the following alterations:

- Add your proficiency bonus to the beast's AC, attack rolls, and damage rolls, as well as to any saving throws and skills it is proficient in.
- Its hit point maximum equals its normal maximum or four times your artificer level, whichever is higher. Like any creature, the beast can spend Hit Dice during a short rest.
- Its creature type is construct, and it is immune poison damage and the poisoned, charmed, and exhausted conditions.
- It has an Intelligence score of 14
- It can understand any language that you speak, and it knows binary, a language of beeps and boops that can communicate basic ideas. You understand binary, but cannot speak it.

While the Steel Companion is within 60ft of you, it acts under your control, and you may activate it and expend a stored spell slot to cast a spell from the Roboticist spell list. The stored spell slots disappear when you take a long rest. If the Steel Companion is further than 60ft away, it will attempt to obey the last command you gave it.

ROBOTICIST SPELL LIST

Artificer Level	Roboticist Spells
3rd	<i>Searing Smite, Heroism, Gust of Wind, Warding Bond</i>
5th	<i>Aura of Vitality, Conjure Barrage</i>
7th	<i>Polymorph, Aura of Purity</i>
9th	<i>Banishing Smite, Mass Cure Wounds</i>

ROBOTICIST MODIFICATIONS

3rd Level Roboticist feature

Also at 3rd level, you know additional modifications that you can apply to your gadgets. This list is detailed at the end of this specialization description.

At the end of a long rest, you may apply modifications to your Steel Companion. These modifications must be from the extended list granted by this feature. The modifications last until the start of your next long rest, and they apply to all spells cast through your Steel Companion.

INTELLIGENT COMPANION

5th Level Roboticist feature

At 5th level, your Steel Companion's AI is improved further and it gains the ability to support you in your explorations of arcane magics and technology. Both you and the Steel Companion gain Expertise in the Arcana skill.

Furthermore, your companion becomes proficient in Thieve's tools and any artisan's tools with which you are proficient. It also gains the benefits of your Right Tool for the Job feature.

MIGHTY COMPANION

9th Level Roboticist feature

Starting at 9th level, when your Steel Companion takes the Attack action, the Companion can make two attacks, or it can take the Multiattack action if it has that action.

COMPANION TRANSFORMATION

15th Level Roboticist feature

Beginning at 15th level, your companion gains the ability to change its form. As a bonus action on its turn, your Companion can choose a beast with a challenge rating of 1/2 or lower. For the next minute, your companion transforms into this beast, using the beast's statblock in place of its own, and keeping the alterations described in the Specialized Device: Steel Companion feature.

Your companion can transform in this way once. In order to use this feature again, it must finish a short rest or spend one spell slot stored in your Steel Companion.

ROBOTICIST MODIFICATIONS

ROBOTIC BODY (CASING)

Your gadget is built into a small robotic delivery system. When activated, the gadget becomes a creature from the creatures available to the *Find Familiar* spell, though it retains its health, AC, and damage threshold described in the Gadgets feature. The gadget acts on your initiative and can't take any action or object interaction except to cast its imbued spell. After casting its imbued spell, the gadget goes dormant and loses the benefits of this modification after 1 minute.

RETROFIT (SPECIAL)

Your gadget is built for fast battlefield repair, allowing you to reuse and repair broken or spent gadgets. As an action, you can touch this gadget and change its imbued spell to another artificer spell that you know of the same level. If this gadget is a broken or unimbued gadget, you may spend a spell slot to imbue the gadget with a new artificer spell as though you had just created it. The gadget retains its previous modifications, and you can apply any new modifications to it.

COMPANION CASTING (TRIGGER)

Your gadget is integrated into your Steel Companion. The Steel Companion can activate the gadget as though it were you, and you lose the ability to do so.
